

Kentucky SkyTalk

Dr. Gary Ferland — [University of Kentucky](https://www.uky.edu/)

Thursday - September 14, 2023 **8:00 PM**

Location: Chem-Phys Room 155

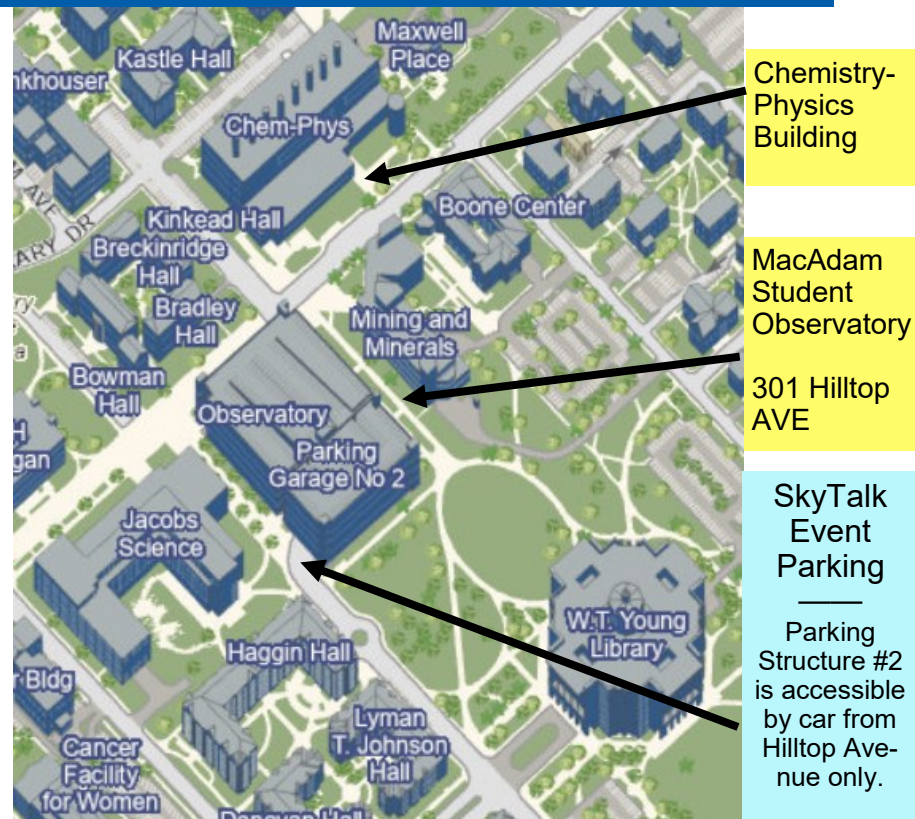

Impacts on the Earth

The Earth has been hit by asteroids throughout its life. These collisions can be large enough to destroy all life. We will talk about how space exploration discovered how these impacts changed the Earth.

Tonight's *Kentucky SkyTalk* is part of an ongoing series. These are presented by the UK Department of Physics and Astronomy, and the MacAdam Student Observatory. Held every 2nd Thursday of the month, they are always free and open to the public.

How to find the MacAdam Student Observatory

Monthly Meetings

The MSO hosts monthly public-observing sessions, each with a kick-off 40 minute presentation in the Chemistry-Physics Building. The presentations will take place even on cloudy nights. If the sky is clear, the observatory will open after the talk! Can't make the SkyTalk? Then come after!

Next month:

October 12, 2023 - **8:00 PM**
