

Kentucky SkyTalk

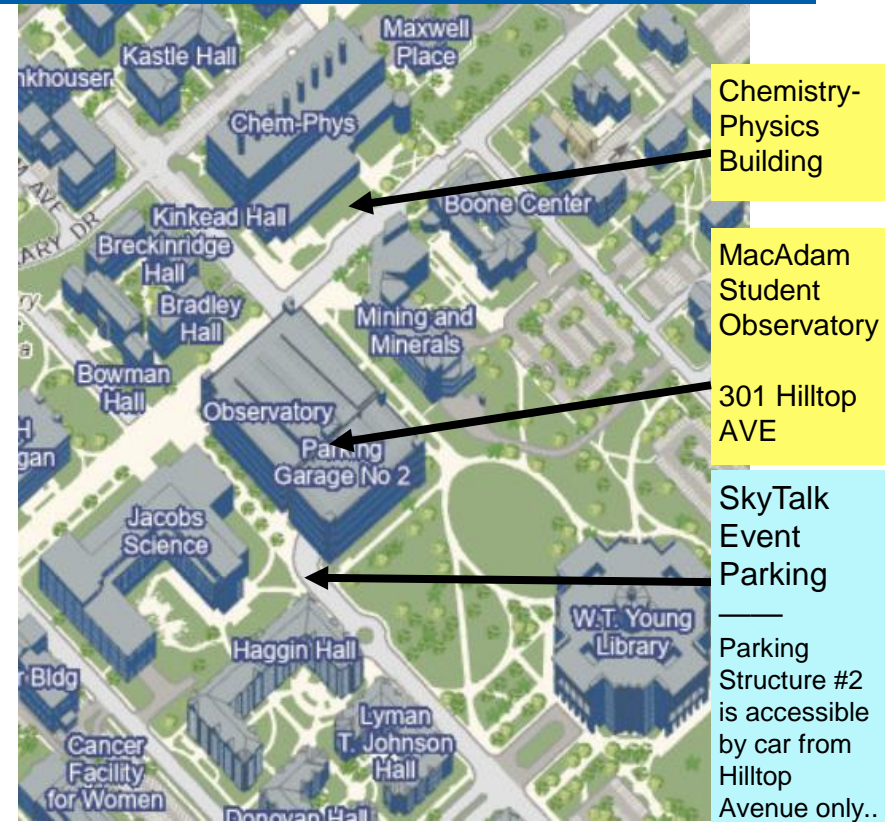

Sheng-Chieh Lin
University of Kentucky

Thursday – February 13, 2025 7:00 PM
Location: Chem-Phys Room 287

Title: Hey black hole! Show yourself!

Abstract: Imagine squeezing Earth really hard with your hands until it's the size of a penny. Congratulations! You've just made a black hole! It's tiny, but it's still as heavy as the Earth. These mysterious objects were first introduced in Einstein's theory and were only discovered indirectly later through observations. In this SkyTalk, I'll cover black holes of all sizes and explain why they're so hard to find!

How to find the MacAdam Student Observatory

Monthly Meetings

The MSO hosts monthly public-observing sessions, each with a kick-off 50 minute presentation in the Chemistry-Physics Building. The presentations will take place even on cloudy nights. If the sky is clear, the observatory will open after the talk! Can't make the SkyTalk? Then come after!
