

Kentucky SkyTalk

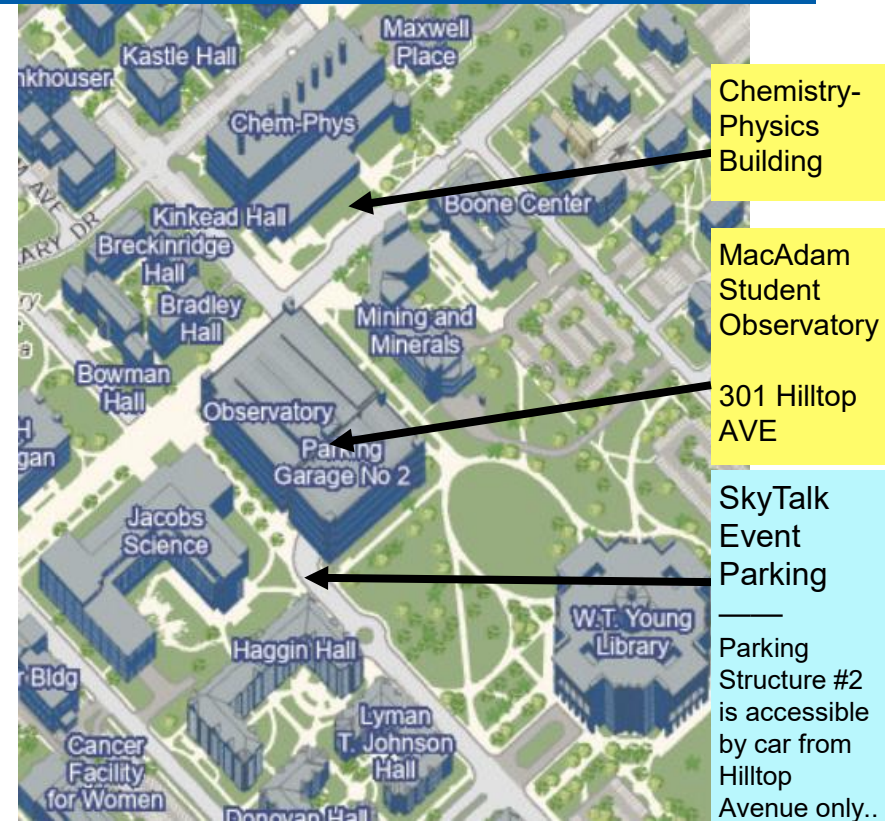

Dr. Tom Troland
University of Kentucky

Thursday – November 13, 2025 7:00 PM
Location: Chem-Phys Room 114

Title: Science in Art, Science as Art

Abstract: At times artistic works are inspired by science and the natural world. At times scientific images are themselves art. And at times, scientific techniques can be used to discover interesting aspects of artistic works. From van Gogh to the most recent NASA planetary missions, science and art are often related, especially in the science of astronomy. The universe is a beautiful place, worthy of fine art. Come see the science and the artistic beauty of the skies with your own eyes.

How to find the MacAdam Student Observatory

Monthly Meetings

The MSO hosts monthly public-observing sessions, each with a kick-off 50 minute presentation in the Chemistry-Physics Building. The presentations will take place even on cloudy nights. If the sky is clear, the observatory will open after the talk! Can't make the SkyTalk? Then come after!
